

Appendix 2

Instructions for suppliers of axicorp Pharma GmbH

To prevent any misconceptions and to ensure smooth processing of your delivery within legal terms we ask you to follow our instructions as listed below:

Requirements when preparing the product:

Before sending the goods to us, please prepare them as follows:

- 1.) Please pack only one product (same batch/expiry) per box/carton.
- 2.) Please do not use styrofoam boxes or cartons without the appropriate lid when shipping goods to axicorp.
- 3.) The delivery note must be included in every shipment.
- 4.) Please do not use styrofoam peanuts.
- 5.) The country of origin must be listed on the delivery note for each product.

All products are to be packaged according to their individual storage and shipping conditions. Products which are not strictly required to be stored at temperature ranges between 2°-8°C or 15°- 25°C can be packed and labeled with the sticker for 2°-25°C.

Cool Products: (2-8°C)

Should the stock ordered from you include goods which are required to be stored and distributed **exclusively** at temperatures **between 2°C and 8°C** we ask you to pack these **separately** (separate package) and label this pallet with sticker 2°C to 8°C.

Other Products: (15-25 °C)

Only combine half pallets of mixed goods (ambient product combined) into one, if the storage and distribution requirements are compatible (2 °C to 25°C **or** 15°C to 25°C). If it is possible to combine, please label this pallet/package with the sticker 15°C to 25°C.

Labeling of packages

Please mark your shipments with your company name or attach packing lists on the outside of each package/palette, so they can be easily identified.

In addition, packages are to be labeled according to their storage and distributing requirements. Please use the stickers as shown here and attach them visibly on the outside of the package (one sticker per package/palette only). These stickers are being provided by axicorp in adequate quantities and can be re-ordered from us any time.
